

14 MIL BUTYL GLOVES

PRODUCT DATA SHEET

Technical Specifications:

Material: Butyl Rubber (14 mil thickness)

Brand: Steif

Size: 350 mm length

Color: Black

Thickness: 14 mil for enhanced durability without sacrificing dexterity

Design: Smooth surface for a comfortable fit, and optimal flexibility for handling tasks

Cuff Style: Beaded

Description:

The 14 MIL Butyl Gloves provide exceptional chemical resistance, protecting against various toxic and corrosive chemicals. Made from durable butyl rubber, these gloves are designed to provide a robust barrier for high-risk applications while maintaining flexibility and comfort.

Features:

- ★Chemical Resistance:
 - Excellent resistance to gases and water vapor
 - Strong protection against ketones, esters, acids, rocket fuel & various chemicals like acetone, acids, and alcohols
 - Low permeability to hazardous substances for extended safety
- ★Abrasion and Tear Resistance: Suitable for environments where puncture resistance is required; highly durable for industrial use
- ★Flexibility: Maintains flexibility and comfort during prolonged wear, ideal for tasks requiring dexterity

Applications:

- ★Chemical Processing: Ideal for handling aggressive solvents and chemicals
- ★Pharmaceutical Manufacturing
- ★Hazardous Material Management
- ★Laboratory Use
