

Technical Specifications:

Model Number	600011
Material	High-grade Aluminium Alloy
Rope Compatibility	Ø 12 mm
Tensile Strength	16 kN
Operation	Manual lock and automatic arrest

Description:

The 600011 Aluminium Rope Grab is a high-strength, portable fall arrest device engineered for vertical movement along a fixed rope. It offers dependable locking performance in the event of a fall, ensuring user safety in climbing or suspension work environments.

Features:

- *Lightweight and compact design for easy handling
- *Smooth vertical movement and firm lock during a fall
- *Corrosion-resistant finish for durability in outdoor use
- *Easy attachment and detachment from the rope
- *Compatible with fall arrest lanyards and harness systems
- *Suitable for work positioning and vertical mobility

Applications:

- *Tower Climbing
- *Rope Access & Rescue
- *Scaffolding and Rigging
- *Telecom & Utility Maintenance
- *Construction & Industrial Height Work
