

Technical Specifications:

Material: High-strength polyester webbing

Harness Type: Full-body harness

Anchor Points: Dorsal D-ring (back)

Webbing Width: 44 mm

Breaking Strength: 23 kN

Weight Capacity: Up to 140 kg

Description:

The Allsafe Safety Harness is a premium fall protection solution designed for industrial, construction, and maintenance applications. Engineered with comfort, durability, and maximum safety in mind, it ensures secure and reliable fall arrest during elevated work activities.

Features:

- ★ **High-Strength Webbing:** Tear-resistant polyester webbing for enhanced durability
- ★ **Dorsal D-Ring:** For secure attachment to lanyards or fall arrest devices
- ★ **Ergonomic Design:** Lightweight and comfortable for extended wear
- ★ **Shock Absorption:** Designed to reduce impact forces in the event of a fall
- ★ **High Visibility:** Bright colors for increased visibility in low-light environments

Applications:

- ★ Construction and maintenance work
- ★ Tower climbing
- ★ Industrial operations
- ★ Confined space entry
- ★ Scaffolding work
