### Description:

The ILP3S Insulating Leather Gloves are premium leather protector gloves designed to be worn over electrical insulating rubber gloves to provide mechanical protection against cuts, abrasions, punctures, and wear during live electrical work. Manufactured from top-grain cowhide leather, the gloves offer excellent durability, flexibility, and comfort while preserving the integrity of the underlying insulating glove.

### Features:

- ★ Premium top-grain cowhide leather construction
- ★ Provides mechanical protection for rubber insulating gloves
- ★ Adjustable wrist strap for secure fit
- ★ Durable gauntlet cuff design for additional forearm protection
- ★ Excellent abrasion and puncture resistance
- ★ Comfortable fit with good dexterity
- ★ Designed for electrical utility and maintenance work
- ★ Long service life under industrial conditions

### Applications:

- ★ Electrical maintenance
- ★ Utility and power distribution work
- ★ Switchgear and panel maintenance
- ★ Live-line electrical operations
- ★ Industrial electrical installations
- ★ Substation maintenance
- ★ Energy and power generation facilities
