

### Technical Specifications:

Hose Size	10mm (Inner Diameter)
Length	100 meters
Color	Orange
Material	Synthetic rubber with reinforced textile layers
Reinforcement	High-strength textile braiding

### Description:

The Orange Propane Welding Hose is a high-performance, flexible hose designed for the safe and efficient transport of propane and other fuel gases used in welding, cutting, and heating applications. It is constructed from durable, flame-resistant materials and meets industry safety standards.

### Features:

- ★ Flame & Heat Resistant: Designed for high-temperature applications in welding and cutting.
- ★ High Flexibility: Allows easy handling and maneuverability in work environments.
- ★ Durable Construction: Reinforced with a textile braid for enhanced strength and safety.
- ★ High Pressure Rating: Capable of withstanding high working pressures for reliable propane delivery.
- ★ Weather & UV Resistant: Suitable for outdoor and industrial use.
- ★ Oil & Abrasion Resistant: Protects against wear and tear in tough work conditions.

### Applications:

- ★ Welding & Cutting Operations – Supplies propane for welding and flame-cutting torches.
- ★ Industrial Heating – Used in applications requiring propane-fueled heating equipment.
- ★ Construction & Fabrication – Essential for metalworking and workshop environments.
- ★ LPG Applications – Can be used for fuel gas delivery in specific propane systems.
