

RC203 RESPIRATOR CARTRIDGES

PRODUCT DATA SHEET

Technical Specifications:

Model	RC203
Material	Activated carbon & high-efficiency filter media
Housing	ABS
Filtration Type	Organic Vapors, Acid Gases, and Particulates
Weight	Approx. 150g per cartridge
Certification	NIOSH Approved

Description:

The RC203 Respirator Cartridge is designed for effective protection against airborne contaminants. It is compatible with a variety of respirators, ensuring reliable filtration in hazardous environments. Ideal for industrial, chemical, and construction applications, this cartridge helps protect users from harmful gases and particulates.

Features:

- ★ High-Efficiency Filtration – Provides protection against organic vapors and acid gases.
- ★ Durable & Lightweight – Designed for long wear and ease of use.
- ★ Easy Installation – Quick and secure attachment to compatible respirators.
- ★ Long Service Life – Extended use with proper care and storage.
- ★ Certified Protection – Meets safety standards for industrial use.

Applications:

- ★ Industrial Workplaces – Protection from chemical vapors and gases.
- ★ Chemical Handling – Ensures safety while working with hazardous substances.
- ★ Spray Painting & Coating – Reduces inhalation of harmful fumes.
- ★ Welding & Metal Cutting – Shields from airborne particulates and fumes.
- ★ Laboratory & Pharmaceutical Settings – Keeps users safe from toxic exposure.
