

STEIF SAFETY SHOE OX

PRODUCT DATA SHEET

Technical Specifications:

Upper Material: High-quality leather for durability and protection against abrasions

Sole: Rubber Outsole

Lining: Cambrelle lining, which is moisture-wicking for added comfort and odor control

Safety Features:

Steel Toecap: Provides robust protection against impacts and compressions

Steel Midplate: Defends against punctures from sharp objects on the ground

Resistance: Resistant to oil and chemicals, making it suitable for use in various hazardous environments

Certification: CE EN ISO 20345:2011 compliant, meeting stringent European safety standards

Brand: STEIF

Description:

The **STEIF OX** Safety Shoes are engineered for industrial and construction settings, providing a balance of durability, comfort, and safety for prolonged use in challenging environments.

Features:

- ★ **Anti-Static Sole:** Minimizes electrostatic discharge risk, protecting users in sensitive environments
- ★ **Shock Absorbing:** Reduces impact and strain on feet and legs, enhancing comfort during long working hours
- ★ **Oil & Chemical Resistance:** Suitable for industrial environments involving exposure to oils, chemicals, and solvents

Applications:

The **STEIF OX** Safety Shoes are ideal for use in construction, manufacturing, chemical processing, and other environments that require high levels of impact and puncture resistance as well as chemical resistance.
