

Technical Specifications:

Product Type	Safety Net
Brand	TAIAN
Material	High-Strength Polypropylene (PP)
Construction	Braided Net Structure*
Color	Green
Weather Resistance	Yes
Application	Fall Protection & Debris Containment
Size	1.5 m × 10.0 m, 4.0 m × 16.0 m 5.0 m × 10.0 m, 8.0 m × 25.5 m

Description:

TAIAN Safety Nets are high-strength protective nets designed to provide fall protection, debris containment, and safety barriers in construction, industrial, maintenance, and infrastructure projects. Manufactured from durable synthetic fibers, these nets offer excellent impact absorption, weather resistance, and long service life under demanding site conditions. The nets are engineered to help prevent injuries caused by falling personnel, tools, or materials, making them an essential safety solution for elevated work areas.

Features:

- ★ High-strength net construction for enhanced safety
- ★ Helps prevent injuries from falling objects and materials
- ★ Durable and weather-resistant design
- ★ UV-resistant for prolonged outdoor use
- ★ Lightweight and easy to install
- ★ Excellent impact absorption characteristics
- ★ Suitable for temporary and permanent safety applications
- ★ Available in multiple sizes to suit project requirements

Applications:

- ★ Construction sites
- ★ Building maintenance projects
- ★ Scaffolding protection
- ★ Bridge and infrastructure works
- ★ Industrial facilities
- ★ Warehouses and storage areas
- ★ Fall protection systems
