

Technical Specifications:

Product Name	Welder's Gloves
Model	H-790RW/W16
Glove Type	Welding Gloves
Color	Red
Length	16" (Approx. 40 cm)
Material	Split Leather
Cuff Style	Extended Gauntlet Cuff
Stitching	Reinforced / Heat Resistant
Protection Type	Heat, Spark, Slag & Abrasion Protection
Application	Welding & Hot Work Operations

Description:

The H-790RW/W16 Welder's Gloves are heavy-duty heat-resistant leather gloves designed to provide reliable hand and forearm protection during welding, cutting, grinding, and other hot work applications. Manufactured from durable split leather, the gloves offer excellent resistance against heat, sparks, slag, abrasion, and mechanical hazards. The extended 16-inch (40 cm) length provides additional forearm protection, while reinforced stitching and welted stress points enhance durability and service life in demanding industrial environments.

Features:

- ★ Premium split leather construction for durability
- ★ Extended 16" length for hand and forearm protection
- ★ Resistant to heat, sparks, welding slag, and abrasion
- ★ Reinforced seams for longer service life
- ★ Comfortable fit for extended use
- ★ Suitable for heavy-duty industrial applications
- ★ Provides excellent grip and handling performance
- ★ Designed for welding and hot material handling operations

Applications:

- ★ Arc Welding
- ★ MIG Welding
- ★ TIG Welding
- ★ Metal Fabrication
- ★ Grinding Operations
- ★ Steel & Iron Industries
- ★ Foundries and Workshops
